**DETAILED ACTION**

***Claim Rejections - 35 USC § 102***

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

2. Claims 1-5 and 13-15 rejected under 35 U.S.C. 102(e) as being anticipated by Benvenuti et al., US Patent No. 6,670,434 (hereinafter "Benvenuti"). Benvenuti teaches a process for preparing a tridentate ligand, with two imine units, with a metal center. See Abstract, col. 1, line 33 through col. 2, line 31. The tridentate ligand also includes a pyridine dentate unit and arylamines. Thus, Benvenuti teaches claims 1-5 and 13-15.

3. Claims 6-12 are objected to for depending upon a rejected base claim.
